

## **Preparation of project documentation and installation of three PV photovoltaic installations of up to 50 kWp in Bydgoszcz**

Within the framework of this task, 3 photovoltaic installations with a total power of 98 kWp were carried out in the design and build standard, including the management building- 40kWp, the concentration plant building- 25 kWp and the treatment plant building- 33 kWp. The work was carried out efficiently and on time. Introl Automatics' experience allowed us to select the optimal solution and efficiently carry out formal procedures for the construction and connection of the installation.
