

# Integrated serialisation and aggregation system for Prespack Sadowo

Integrated system for serialization and aggregation, equipment for printing and verification of 2D codes, opening security and aggregation. The peculiarity of Prespack is contract manufacturing for many pharmaceutical companies, which translates into both a large number of connections between serialization systems, multiple products and formats, or parallel import orders.

Taking into account these conditions, special equipment was prepared to enable serialization of non-standard packaging, to conduct scanning for parallel imports. Thanks to the efficient implementation of the project, Prespackby was one of the first companies to be able to conduct full parallel import operations and data exchange with contract customers.

### Scope of work:

1. cooperation in the preparation of requirements specifications (workshops with users)
2. installation of serialization softwareCureSynci integrations with:
  - contract partners
  - production devices
3. delivery of serialization and aggregation devices,
4. qualification of the entire system.
